KIDNEY CARE IN OREGON: HOUSE DISTRICT 35

Rep. Farrah
Chaichi

Kidney disease affects an estimated 37 million people in the United States, and approximately 90% of those with kidney disease don't know they have it. With support from elected officials and the community, we can reduce kidney disease diagnoses, improve patient outcomes and pioneer new research that will inform best practices and innovative treatment methods for future generations. All data below is reported at a county level. More information and links to data sources are available at NWKidneyCouncil.org.

House District 35 Dialysis Footprint

9 Dialysis Centers

32 Nephrologists

1,324 ESRD Patients

House District 35 Prevalence of CKD

17.18%

The average prevalence rate for
the counties in House District 35

End Stage Renal Disease (ESRD) is the 5th and final stage of Chronic Kidney Disease (CKD). Individuals with ESRD need dialysis or a kidney transplant to survive.
