

# KIDNEY CARE IN WASHINGTON STATE: SENATE DISTRICT 15

Sen. Nikki Torres

Kidney disease affects an estimated 37 million people in the United States, and approximately 90% of those with kidney disease don't know they have it. With support from elected officials and the community, we can reduce kidney disease diagnoses, improve patient outcomes and pioneer new research that will inform best practices and innovative treatment methods for future generations. All data below is reported at a county level. More information and links to data sources are available at [NWKidneyCouncil.org](http://NWKidneyCouncil.org).

## Dialysis Footprint

**5** Dialysis Centers

**11** Nephrologists

**612** ESRD Patients

End Stage Renal Disease (ESRD) is the 5th and final stage of CKD. Individuals with ESRD need dialysis or a kidney transplant to survive.
